

# Spotlight on the Environment!

5/6O have been learning about how humans impact on our environment and how we can conserve the natural resources for today and well into the future.

## **Reduce – Reuse – Recycle**

What can YOU do to *make a difference*?

Walk to school  
to reduce car  
pollution.

TURN OFF LIGHTS  
& COMPUTER  
MONITORS WHEN  
NOT IN USE.

Start your own  
vegetable  
garden &  
compost.

**Limit the length of your  
shower and turn off the tap  
when you are brushing your  
teeth.**

**Sort out the rubbish and  
recycle as much as you  
can – glass, cans, PET  
plastic, paper &  
cardboard.**

Get outside and play –  
it's better for your health  
and reduces the use of  
electricity in your home.

Buy a reusable  
water bottle –  
don't keep getting  
new ones 😊

Here is a selection of **Eco Homes** we have been making at home and at school.

We have researched how to design homes that are **environmentally friendly** and **sustainable**.

Can you spot the water tanks, solar panels, recycled materials, vegetable gardens, compost, windmills, water saving toilets...?
